

Northwind Commerce — Synthetic Accessibility Assessment

Northwind Commerce (fictional) · <https://northwind.example> · 12 scored pages · scanned 8/20/2026

1. Executive summary

Percevia AI scanned **12** page(s) of <https://northwind.example> against WCAG 2.2 AA-oriented checks via axe-core. The scan surfaced 8 automated findings, of which 2 are critical and 3 are moderate. 2 finding(s) require human review because automated checks could not fully decide.

2. Scan scope & limitations

- Pages successfully analyzed and included in scoring: 12
- Standard: WCAG 2.2 AA-oriented (axe-core ruleset)
- Automated tooling cannot detect every accessibility issue; human review remains required.
- Authenticated pages and visual issues that require manual inspection were not covered.

3. Top priority fixes

Findings are grouped by root cause. Fixing these collapses the most instances at once.

1. **Give interactive controls specific accessible names** — 3 instance(s) · [interactive-names](#)
2. **Associate every checkout input with a persistent label** — 1 instance(s) · [form-labels](#)
3. **Raise contrast in the muted text token** — 4 instance(s) · [design-tokens](#)
4. **Repair page landmarks and heading hierarchy** — 2 instance(s) · [document-structure](#)

4. Findings by root cause

Critical

Give interactive controls specific accessible names (3 instances)

[interactive-names](#) · wcag412 · Add visible or programmatic names that describe each control's action and destination.

Affected pages: <https://northwind.example/checkout> , <https://northwind.example/wishlist>

Critical

Associate every checkout input with a persistent label (1 instance)

[form-labels](#) · wcag412 · Use a label element or an equivalent programmatic association; do not rely on placeholder text.

Affected pages: <https://northwind.example/checkout/delivery>

Moderate

Raise contrast in the muted text token (4 instances)

[design-tokens](#) · wcag143 · Update the shared muted-text token and verify it in every supported theme.

Affected pages: <https://northwind.example/products/harbor-lamp>

Moderate Repair page landmarks and heading hierarchy (2 instances)

document-structure · — · Use one main landmark and a sequential heading outline on each template.

Affected pages: https://northwind.example/account/orders , https://northwind.example/help/returns

Review Verify the critical journey with keyboard and a screen reader (2 instances)

manual-review · manual-review · Complete the guided review with at least one keyboard-only and one screen-reader pass.

Affected pages: https://northwind.example/checkout , https://northwind.example/cart

5. Findings by page

PAGE	CRITICAL	MODERATE	MINOR	REVIEW
https://northwind.example/checkout	1	0	0	1
https://northwind.example/checkout/delivery	1	0	0	0
https://northwind.example/products/harbor-lamp	0	1	0	0
https://northwind.example/account/orders	0	1	0	0
https://northwind.example/wishlist	0	1	0	0
https://northwind.example/help/returns	0	0	1	0
https://northwind.example/cart	0	0	0	1

6. WCAG mapping

WCAG TAG	FINDINGS
wcag2a	3
wcag412	3
wcag2aa	1
wcag143	1
wcag211	1
wcag413	1

7. Remediation roadmap

Sequenced from this scan's own findings, most-blocking first. Instance counts are what each fix collapses.

Now — blocking

These findings block people from completing the task at all.

1. Give interactive controls specific accessible names — 3 instances · interactive-names · Add visible or programmatic names that describe each control's action and destination.

2. **Associate every checkout input with a persistent label** — 1 instance · `form-labels` · Use a label element or an equivalent programmatic association; do not rely on placeholder text.

Next — degrading

The task stays possible but materially harder for assistive-technology users.

1. **Raise contrast in the muted text token** — 4 instances · `design-tokens` · Update the shared muted-text token and verify it in every supported theme.
2. **Repair page landmarks and heading hierarchy** — 2 instances · `document-structure` · Use one main landmark and a sequential heading outline on each template.

Needs a human decision

Automated checks could not decide these; they are not scheduled work until someone reviews them.

1. **Verify the critical journey with keyboard and a screen reader** — 2 instances · `manual-review` · Complete the guided review with at least one keyboard-only and one screen-reader pass.

8. Human review

These cannot be decided automatically. Run them against the pages this scan actually covered:

`https://northwind.example/checkout` , `https://northwind.example/checkout/delivery` ,
`https://northwind.example/products/harbor-lamp` , `https://northwind.example/account/orders` ,
`https://northwind.example/wishlist` , `https://northwind.example/help/returns` ,
`https://northwind.example/cart` .

No manual review has been recorded for this scan yet, so nothing below has been checked by a person.

Still outstanding:

- Keyboard-only walkthrough (2.1.1, 2.1.2)
 - Screen reader pass (1.3.1, 4.1.2)
 - Zoom and reflow (1.4.4, 1.4.10)
 - Reduced motion (2.3.3)
 - Focus order and visibility (2.4.3, 2.4.7)
 - Link purpose in context (2.4.4)
 - Form errors and suggestions (3.3.1, 3.3.3)
-
- 2 findings marked “needs review”: automated checks could not decide these, so a human must.

This report is an accessibility assessment aid, not a legal certification. It reflects findings at the time of the scan and does not certify compliance with any law, regulation, or standard.
